TRAILS:

Trails Associated with the Wet Trail Closure - **All Trails Now Open**

- This includes: Mill Canyon 040, Tibble Fork 041, Salamander Flat 150, Ridge Trail 157, Mud Springs 173, Willow Hollow 159, South Fork Little Deer Creek 252
- There may be small wet sections still, please travel through these areas respectfully to reduce trail damage
- Thank you to all who have adhered to the wet trail closure this year, the trails are in great shape!

Wilderness Trails:

- Trail conditions are not changing as the snow is all gone. It is getting very dry as the springs quit running. The flowers are still present, particularly in the upper basins, but the peak bloom has passed. The snowfield is mostly melted and few people are venturing down it. Our biggest challenge now appears to be the afternoon/evening thunderstorms. Hikers should be prepared for potential rain. Lightning is always a concern. Water is getting more scarce as the summer progresses.
- As you are planning trips this summer for the Lone Peak or Mount Timpanogos Wilderness Areas please remember:
 - 15 Person Group Size limitation
 - No camp fires in the entire Mount Timpanogos Wilderness or the Silver Lake Basin of the Lone Peak Wilderness
 - Shortcutting switchbacks is prohibited, stay on the main trail to reduce trail damage and erosion and to increase your safety

For more wilderness information please visit: www.wilderness.net

Other trail updates:

- **Dry Creek Trail is open. However, the trailhead is closed until further notice. Hikers must park off the road before the closed trailhead.**
- **As a rule of thumb avoid using any trails for a day or possibly two after any significant rain fall so that they have adequate time to dry.**
